

LOVAT in the Iberian Peninsula – New Facility in Lisbon, Portugal

LOVAT is pleased to announce the opening of operations in the Iberian Peninsula. The technical base, located adjacent to the Lisbon International Airport in Portugal, will be used for the refurbishment of TBMs, Parts Supply and Technical Support for the European market. Plant and Technical services will be managed by Jaime Jacinto, Equipment Manager.

LOVAT Iberica is currently refurbishing a LOVAT RME147SE Series 22001 TBM for Theiss Pty. Ltd. After successfully completing a tunnel project in Algeria, the TBM is now destined for Australia for construction of the City West Cable Tunnel (CWCT) in Sydney.

This expansion will allow LOVAT to better serve its clients in Europe, demonstrating our commitment to overall customer satisfaction.

For more details, please contact LOVAT's main offices in Toronto, Canada, or visit our website.
